IMAGE DATA PROCESSING SYSTEM
ABSTRACT OF THE DISCLOSURE

An image data processing system comprising;

an image inputting section for inputting image data;

an image processing section that performs image processing on the input image data to create image data for printing;

a first controlling section that performs controls over the image inputting section and the image processing section; and

an image transmitting section capable of simultaneously transmitting the image data for printing to a print preparing device and to an image storing device, characterized in that the image storing device includes;

an image receiving section that receives the image data for printing that are transmitted from the image transmitting section;

a storing medium for storing the received image data; and

a second controlling section that performs controls over the image receiving section and the storing medium.
